

M. Dalbert Ma

CONTACT INFORMATION	dma@london.edu (+44) 7557 656922	London Business School Regent's Park, London NW1 4SA	dalbertma.com
INTERESTS	AI & Organizations, Human-AI Interaction, Organizational Design, Strategy		
EDUCATION	London Business School , PhD in Strategy & Entrepreneurship		2027
	IESE Business School , MSc in Management		2020
	Pompeu Fabra University , LLM in Law & Economics		2019
	University of York , BA in Philosophy, Politics & Economics		2018
JOB MARKET PAPER	[1] Ma, M.D. The Organizational Tradeoff of AI Coordination: Evidence from a Container Port Abstract: Centralization can improve operational efficiency by coordinating interdependent activities, yet impede adaptation when changing local conditions must be communicated and interpreted at the center. Artificial intelligence (AI) may ease these information-processing demands, raising the question of how pure-AI and human-AI systems navigate the efficiency-adaptation trade-off. I study these systems at one of the world's largest container terminals, where the same AI dispatches an autonomous fleet through pure-AI and human-AI zones. Across 179,925 tasks over 364 days, pure-AI zones move 11% more cargo per vehicle in ordinary operation, sustaining equivalent crane output with fewer vehicles. Under recurrent mechanical faults - familiar disruptions with unpredictable timing - per-vehicle productivity is statistically indistinguishable across arrangements, although pure-AI zones recover more slowly. During unprecedented geomagnetic storms, human-AI zones sustain higher crane output: pure-AI zones lift 13% less cargo per crane-hour. A formal model shows how a configuration favored under a historical distribution can lose its expected-performance advantage when that distribution changes. The findings suggest that pure-AI systems can operate more efficiently while remaining less adaptable than human-AI systems to unfamiliar disruptions. • <i>Awards (2026)</i>: AOM Robert J. Litschert Best Doctoral Student Paper Award; AOM STR Best Paper Award; William H. Newman Dissertation Award Finalist; SMS Best Paper Prize Finalist • <i>Selected Presentations (2026)</i>: Wharton WINDS, MIT Business Implications of GenAI, Columbia Business School ECDC, Duke Strategy PhD Conference, CCC, Harvard AI Institute OUI Conference, Academy of Management, Oxford ISA, Strategic Management Society

	Co-organizer, “Diversification in the Digital Age: Should We Rethink Our Premises?” <i>Strategic Management Society Annual Conference (October 2024)</i> . With L. Capron, M.G. Jacobides, G. Lanzolla, C. Markides, P. Puranam, and Y. Romanenkov.	
	Co-organizer, “Opening the Black Box of Diversification: Mechanisms and Dynamics” <i>Academy of Management Annual Meeting (August 2024)</i> . With C. Baldwin, C.E. Helfat, M.G. Jacobides, C. Magelssen, and J. Santalo.	
AWARDS	Academy of Management Robert J. Litschert Best Doctoral Student Paper Award	2026
	Academy of Management STR Division Best Paper Award	2026
	Academy of Management William H. Newman Dissertation Award Finalist	2026
	Strategic Management Society Best Paper Prize (Nominee)	2026
	LBS Sir James Ball Award 25/26 (Runner-Up)	2025
GRANTS	Noorjehan Pirani PhD Fellowship Award, £10,000	2026
	LBS Research & Materials Development Grant, £10,000	2026
	Institute of Entrepreneurship and Private Capital Grant, £9,500	2024
TEACHING	London Business School	
	Tutor, Developing Strategy for Value Creation (EMBA)	2022–2026
	Teaching Assistant, Profit, Power & Fairness in the Digital Economy (MBA)	2024–2026
	Tutor, Next Generation Digital Strategy (EMBA)	2024–2025
	Tutor, Aramco Executive Finance Strategy Programme (EMBA)	2025
